

Amendments to the Claims

The following listing of claims, if entered, will replace all prior versions, and listings, of claims in the above-identified patent application.

Listing of Claims

1. (Currently Amended) A method for analyzing a corporate disclosure, comprising:
providing a record of a disclosure made by a representative,
identifying within the record a stimulus given to the representative,
reviewing behavior of the representative within the record for a pre-determined period of time after the stimulus ~~behavior of the representative responsive to the stimulus~~ to determine the presence of a cluster of two or more deceptive behaviors responsive to the stimulus,
counting a number of deceptive behaviors responsive to the stimulus in the predetermined period of time, and
noting ~~an identified~~ the determined cluster and the number of deceptive behaviors in the determined cluster within [[a]] the record of the disclosure.

2. (Original) A method according to Claim 1, wherein identifying a stimulus includes identifying a question or statement posed to the representative.

3. (Original) A method according to Claim 1, wherein reviewing behavior includes reviewing behavior for a predetermined verbal or non-verbal response.

4. (Original) A method according to Claim 1, further comprising subdividing the disclosure into sections.

5. (Original) A method according to Claim 4, wherein subdividing into sections includes topics, time periods, representatives, and interviewers.

6. (Currently Amended) A system for analyzing a corporate disclosure, comprising:

a recorder for generating a record of a disclosure by a corporate representative,

a display for presenting the record for analysis by a reviewer, and

annotation means for allowing the reviewer to annotate the record to indicate the presence of a cluster of deceptive behavior and a number of deceptive behaviors delivered by the representative within the record in response to a stimulus within the record and within a predetermined time period.

7. (new) A method according to Claim 1, wherein the pre-determined period of time is a period of time from the beginning of the stimulus until approximately five seconds after the stimulus ends.

8. (New) A method according to Claim 7, further comprising reviewing the behavior of the representative after the pre-determined period of time to determine the presence of deceptive behaviors whenever at least one deceptive behavior is determined within the pre-determined period of time.

9. (New) A method according to Claim 1, wherein the cluster of two or more deceptive behaviors comprise two or more of a same behavior.

10. (New) A method according to Claim 1, wherein the cluster of two or more deceptive behaviors comprise two or more of a different behavior.
